

Shafay Memon

Full-Stack Developer · Technical Tutor · CS Student @ University of Leeds

07404 498 638

shafaymemon26@gmail.com

shafaym.com

PROFILE

Computer Science student at the University of Leeds with hands-on experience building full-stack web applications using TypeScript, Python, Vue.js, React, Supabase and Firebase. Demonstrated ability to ship real products under pressure, including a full-stack community platform at LeedsHack 2026. Currently tutoring GCSE STEM subjects, developing strong communication and the ability to break down complex ideas — skills that translate directly into collaborative engineering teams.

EXPERIENCE

Full-Stack Developer & Technical Tutor [Self-Employed / Freelance](#) 2024 – Present

- Build and deploy full-stack web applications using TypeScript, React, Vue.js, Python, Supabase and Firebase, deploying via Vercel with Git/GitHub for version control.
- Designed and shipped shafaym.com — a fully responsive personal portfolio site built with React, Tailwind CSS and Vite, demonstrating end-to-end ownership from UI to production deployment.
- Tutor GCSE students in Physics, Biology and Further Maths (AQA), translating technical concepts clearly to students and progress updates to parents.
- Manage client communications independently, building accountability and professional working relationships.

Hackathon Participant — LeedsHack 2026 [LeedsHack](#) 2026

- Built Community Connect — a full-stack community events organiser and social platform that helps people discover local events, join communities and chat, using Vue.js, TypeScript, Python and Supabase.
- Competed in a time-pressured environment, collaborating with teammates to scope, prototype and ship a working product within the event window.
- Gained practical experience in rapid prototyping, task division and integrating a full backend under deadline.

Work Experience — Munroe K [Munroe K](#) 2024

- Worked in a team of three to redesign a commercial workspace floor plan, presenting the concept to stakeholders.
- Developed transferable skills in project planning, creative problem-solving and professional presenting.

Workplace Visit — British Library [British Library](#) 2024

- Observed AI, robotics and software systems used to catalogue and store all UK-published content at scale.
- Deepened understanding of how large-scale data engineering and automation operate in a real production environment.

Employability Programme — Sparks Mentoring [Sparks Mentoring](#) 2024

- Completed a structured professionalism development programme focused on workplace readiness.
- Met with engineers from the MARS IT department, learning how enterprise server infrastructure and networks are built and maintained.

PROJECTS

Community Connect [[Vue.js](#) · [TypeScript](#) · [Python](#) · [Supabase](#)]

- Full-stack community events platform built at LeedsHack 2026 — allows users to discover local events, join communities and chat in real time.
- Architected the backend with Python and Supabase, and the frontend with Vue.js and TypeScript, delivering a live, working product within the hackathon timeframe.

Personal Portfolio — shafaym.com [[React](#) · [Tailwind CSS](#) · [Vite](#)]

- Designed and built a fast, animated, responsive personal portfolio from scratch to showcase projects, skills and experience.
- Demonstrates full ownership of a production web project: UI design, responsive layout, performance optimisation and Vercel deployment.

Tetris Game [JavaScript · HTML5 · CSS]

- Recreated the classic Tetris game in the browser, implementing piece movement, rotation, line clearing and scoring logic from scratch.
- Deepened understanding of game loop architecture, DOM manipulation and CSS animation.

Drawing Tool [JavaScript · HTML5 Canvas · CSS]

- Built a browser-based drawing application with brush controls for sketching and creating digital art using the HTML5 Canvas API.

Tutor4U [HTML · CSS · JavaScript]

- Designed and built a tutoring service website connecting students with tutors, with clear information on services and how to get started.
- Reflects real-world web design skills and an understanding of user-facing product layout.

Weather App [HTML · CSS · JavaScript]

- Built a weather app that fetches and displays current weather for the user's location or any searched city via a REST API.
- Demonstrates practical experience integrating third-party REST APIs and handling async data in vanilla JavaScript.

Stock & ETF Market Tracker [Python · APIs · Data Analysis]

- Built personal tooling to track and analyse memory/semiconductor stocks and ETFs on Trading 212, monitoring sector events such as Micron earnings and broader market contagion.
- Developed practical skills in API integration, data parsing and financial market analysis — directly applicable to fintech and data engineering roles.

EDUCATION

BSc Computer Science — University of Leeds

2025 – Present

Pursuing a passion for software engineering and technology, building on extensive self-taught and project-based development experience.

A Levels — Elliot Hudson College

2023 – 2025

Mathematics · Further Mathematics · Physics · Computer Science

GCSEs — Leeds West Academy

2022 – 2023

Mathematics: 9 · English: 6 · Science (Double Award): 7-7 · Silver Mathematics Award

CERTIFICATIONS

Python Basics — University of Michigan (Coursera) · 2025

Maximise Productivity With AI Tools — Google (Coursera) · 2026

TECHNICAL SKILLS

Languages: Python · JavaScript · TypeScript · C# · C++ · SQL · CSS3

Frontend: React · Vue.js · HTML5 · Tailwind CSS · Vite

Backend & Databases: Node.js · Python · Firebase · Supabase · REST APIs

Tooling: Git · GitHub · VS Code · Vercel · Agile / Scrum

Other: 60 WPM · Fluent: English, Urdu, Sindhi · Silver Maths Award

INTERESTS

Stock & ETF trading (memory / semiconductor sector) · Hackathons · Photography · Hiking & Cycling · Badminton
