PROFILE

Second-year Computer Science student with two years of self-directed full-stack development experience across TypeScript, Python, React and Vue. Have designed, built and deployed production web applications end to end, including a JWT-authenticated React/FastAPI system and a platform shipped under deadline at LeedsHack 2026. Now looking to further develop my skills and experiences in a challenging software engineering placement year.

EDUCATION

- BSc Computer Science** · University of Leeds 2025 – 2029
- Working towards a 2:1 or above.
 - Year 1 modules: Theoretical Foundations of Computer Science · Computer Systems and Architecture · Programming.
- A Levels** · Elliot Hudson College 2023 – 2025
- Mathematics A · Further Mathematics B · Computer Science B
- GCSEs** · Leeds West Academy 2022 – 2023
- Mathematics 9 · English 6 · Science (Double Award) 7-7 · Silver Mathematics Award

EXPERIENCE

- Freelance Developer & Technical Tutor** · Self-Employed 2024 – Present
- Build and deploy full-stack web applications in TypeScript, React, Vue.js and Python, backed by Supabase and Firebase, shipping to production on Vercel with Git/GitHub for version control.
 - Tutor more than 10 students, GCSE and A level Physics, Biology and Maths/Further Maths (AQA), explaining technical concepts to non-technical audiences and reporting progress to parents.
- Hackathon Participant** · LeedsHack 2026
- Built Community Connect, a full-stack events and social platform, with a team of 4 over 24 hours, scoping, dividing work and shipping a working product within the window.
 - Took responsibility for the backend, integrating Python services with Supabase and delivering a live demo to judges.
- Work Experience** · Munroe K 2024
- Worked in a team of three to redesign a commercial workspace floor plan, presenting the concept to stakeholders.
 - Developed transferable skills in project planning, creative problem solving and professional presenting.
 - Cut from outward-facing CVs: non-technical and pre-university. Restore only if a form asks for all work experience.

PROJECTS

- AIWardrobe** [*React · FastAPI · Supabase · JWT*]
- Designed a decoupled architecture: a React/Tailwind frontend consuming a FastAPI REST backend, with JWT authentication so the backend verifies tokens without ever handling passwords.
 - Built a rule-based outfit engine scoring combinations on colour harmony and formality, chosen over an ML model for latency, cost and explainability.
 - Deployed both tiers to production with environment-based configuration and CORS handling.
- Community Connect** [*Vue.js · TypeScript · Python · Supabase*]
- Full-stack platform for discovering local events, joining communities and messaging in real time, built at LeedsHack 2026.
 - Architected the Python/Supabase backend and integrated it with a Vue/TypeScript frontend under a hard deadline.
- Distributed MicroBit Sensor Network** [*Networked hardware · Python · Pandas*]
- Configured and networked multiple hardware sensor nodes, diagnosing connectivity and reliability faults until the system logged data stably over long runs.
 - Built a real-time pipeline processing readings into visual insights, with a modular workflow and unit testing.
- 2D Platformer Engine (A-Level NEA)** [*Unity · C# · OOP*]
- Built a complete game from scratch with level progression, enemy AI and scaling difficulty, decomposed into 14 features across 8 sprints.
 - Validated with function, robustness and usability testing against pre-defined success criteria.
- Personal Portfolio, shafaym.com** [*React · Tailwind CSS · Vite*]
- Designed, built and deployed a responsive portfolio from scratch, owning UI design, performance optimisation and Vercel deployment.

TECHNICAL SKILLS

Languages Python · TypeScript · JavaScript · C# · C++ · SQL
Frontend React · Vue.js · Tailwind CSS · Vite · HTML5 · CSS3
Backend & Data FastAPI · Node.js · Supabase · Firebase · REST APIs · PostgreSQL · Pandas

Tooling & Practice · Git · GitHub · Vercel · VS Code · Unit testing · Agile / Scrum

CERTIFICATIONS

- Python Basics, University of Michigan, 2025.
- Maximise Productivity with AI Tools, Google, 2026.
- Introduction to AI, Google, 2026
- HTML/CSS Full Course, SuperSimpleDev completed August 2026

ADDITIONAL

Fluent in English, Urdu and Sindhi. Interests: equity and ETF markets, photography, hiking, cycling, badminton.
