PROFILE

Second-year Computer Science student at the University of Leeds on a degree with an assessed 12-month year in industry, available full time from summer 2027. Self-taught full-stack developer who has designed, built and deployed over a dozen projects, from React and Vue.js frontends through Python and FastAPI services to Supabase data layers, including the first ever website for a 200+ member university society. Publishes daily programming content to 3,000+ followers as code_dailybuild, and follows equity markets closely through a personal portfolio and a Python market data tool built around it.

EDUCATION

BSc Computer Science (Industrial) · *University of Leeds* 2025 to 2029

- **On track for a 2:1 or higher**. The programme includes an assessed 12-month industrial placement, scheduled for 2027/28.
- Relevant modules: Algorithms and Data Structures, Object-Oriented Programming, Databases, Software Engineering.

A Levels · *Elliot Hudson College* 2023 to 2025

- Mathematics A · Further Mathematics B · Computer Science B

GCSEs · *Leeds West Academy* 2022 to 2023

- Mathematics 9 · Science (Double Award) 7-7 · English 6 · Silver Mathematics Award

SELECTED PROJECTS

AIWardrobe · *React · Vite · Tailwind CSS · FastAPI · Supabase · JWT · REST · Vercel*

- A full-stack outfit recommendation website, built after watching a family member struggle with an overfilled wardrobe. Users catalogue their garments and get outfit suggestions from their own collection.
- Designed a decoupled architecture: a React and Tailwind frontend consuming a FastAPI REST backend, with Supabase providing authentication, the database and garment image storage.
- Secured the API with JWT authentication: the backend verifies Supabase-issued tokens against the auth service, so it never handles raw passwords.
- Weighed a machine learning recommender against a rule-based engine that scores combinations on colour harmony and formality, and chose rules for speed, zero running cost and explainable results.

uolpaksoc.co.uk · *HTML · CSS · JavaScript · Supabase · Vercel*

- Built the first ever website for the University of Leeds Pakistani Society, serving 200+ members and promoting events with 300+ attendees.
- Wrote it framework-free for fast loading, backed by Supabase; set up the custom domain and Vercel deployment, and maintain it year round.

Community Connect · *LeedsHack 2026 · Vue.js · TypeScript · Python · Supabase* 2026

- A full-stack community events and messaging platform built in a team of 4 in 24 hours, letting users discover local events, join communities and chat in real time.
- Worked across the frontend and backend with the team, agreeing interfaces up front so both sides could be built in parallel.
- Reviewed teammates' changes before merging, integrated branches under time pressure and demonstrated the working product to judges.

Distributed micro:bit Sensor Network · *University coursework · MicroPython · Python · UART · Pandas · Matplotlib*

- Led technical development in a team of 6 building a network of micro:bit sensors that collected CO_2 and air quality telemetry over UART.
- Analysed readings in Pandas and Matplotlib, found the wireless range limits on simultaneous logging, and switched the design to individual device recording to get reliable data.
- Took on extra sensors when the team fell behind, after raising it with the group, so the project was delivered on time.

Digital Traffic and Pedestrian Crossing Controller · *University coursework · HDL · digital logic*

- Designed sequential logic with registers, counters and finite-state control, built from D flip-flops and multiplexers, and validated it across 14 simulation cycles against expected outputs.

Equity and ETF Market Tracker · *Python · REST APIs · Pandas · SQL · In progress*

- Grew out of managing a personal equity and ETF portfolio since 2024, concentrated in memory and semiconductors, where decisions were being made from a spreadsheet updated by hand.
- Automates retrieval of market data over REST APIs, then validates, cleans and stores it for repeatable analysis of price, holdings and sector events such as memory maker earnings.

2D Platformer Game · *Unity · C# · OOP · Agile*

- Built a complete platformer with level progression, enemy AI, collectibles, a health and lives system and scaling difficulty, split into 14 features across 8 sprints and verified through function, robustness and usability testing.

Personal Portfolio, shafaym.com · *React · Tailwind CSS · Vite · Vercel*

- Designed and built an animated, responsive portfolio from scratch, covering UI design, performance and deployment.

Further Projects

- **Tutor4U** (HTML, CSS, JS): a tutoring service website. **Weather App** (JS, REST API): live weather by location or city. **Tetris** (JS, DOM): movement, rotation, line clears and scoring. **Drawing Tool** (HTML5 Canvas).

EXPERIENCE

Photographer and Media Lead · *University of Leeds Pakistani Society* Jun 2026 to Present

- Elected to a committee of 10 serving 200+ members; run photography and media across a calendar of events drawing 300+ attendees.
- Built and maintain the society's website, uolpaksoc.co.uk, and keep its visual identity consistent across web and social media.

Creator and Programmer · *code_dailybuild, TikTok and Instagram* Ongoing

- Grew a programming page to 3,000+ followers and 50,000+ likes by publishing short-form builds and explanations for a general audience.
- Currently running 100 Days of Python, attempting a new Python project every day alongside a full-time degree.

Technical Tutor · *Self-Employed* Jun 2023 to Present

- Tutor 10+ students in GCSE Physics, Biology and Further Mathematics and A level Mathematics, adapting explanations to each student's level of confidence.

Part-Time Work 2025 to Present

- **Student Ambassador**, University of Leeds (Oct 2026 to Present): campus tours for prospective students and families.
- **Sales Assistant**, Savers, Rothwell (Oct 2026 to Present). **Sales**, Echo Promotions (Jun to Jul 2026). **Warehouse work**, pharmaceutical warehouse (summer 2025).

EARLY EXPERIENCE

- **Munroe K** (2024): redesigned a commercial floor plan in a team of 3 and presented it to stakeholders. **Sparks Mentoring** (2024): workplace readiness programme, including time with the MARS IT team on enterprise infrastructure. **The British Library** (2024): saw the software and robotics used to catalogue UK publications at scale. **Kumon** (2020 to 2021): tutor.

TECHNICAL SKILLS

Languages Python · JavaScript · TypeScript · C# · SQL · HTML · CSS · MicroPython

Frameworks and Libraries React · Vue.js · FastAPI · Node.js · Tailwind CSS · Vite · Pandas · Matplotlib · Unity

Data Supabase (PostgreSQL) · Firebase · REST APIs · relational modelling · data structures and algorithms

Practice and Tooling Git and GitHub · code review · Agile and Scrum · CI/CD with Vercel · testing · JWT authentication · AI-assisted development (reviewing and testing generated code)

Hardware micro:bit · UART · digital logic and HDL

TRANSFERABLE SKILLS

Communication Explaining technical ideas simply: tutoring 10+ students, campus tours, demoing to LeedsHack judges, content for 3,000+ followers.

Teamwork and Leadership Led a team of 6 (micro:bit network), shipped a product in a team of 4 in 24 hours (LeedsHack), society committee of 10.

Problem Solving Turn real problems into working software (AIWardrobe, market tracker); redesigned the micro:bit setup when testing exposed its limits.

Time Management Balance a full-time degree with tutoring, part-time work, committee duties and a daily coding challenge.

Initiative Self-taught full-stack developer; built the society's first website unprompted; took on extra work when my team fell behind.

Customer Service Face-to-face work with the public in sales (Echo Promotions, Savers) and as a Student Ambassador.

CERTIFICATIONS AND ADDITIONAL

Certifications Introduction to AI and Maximize Productivity With AI Tools, Google via Coursera (Jan 2026) · Python Basics, University of Michigan via Coursera (Nov 2025) · HTML and CSS Full Course, SuperSimpleDev (Aug 2026) · Python Logic and Flow, Coddy (Sept 2026)

Languages English, Urdu, Hindi and Sindhi

Interests Photography and video editing, hiking, cycling, badminton, equity markets.
